

Black Harding Update Joseph Laura, Jr.
(#1238)

The Perfins Bulletin, May 1991, pp. 103-4 published a listing by Harry Rickard of perfins patterns known on the Black Harding issue. That article probably produced more mail than any other article ever published in *TPB*. An extensive revision and extension of that list was printed in *TPB*, November/December 1991, pp. 221-4. Since then the following additional discoveries have been made.
